## DART CONNECT

### THE POWER OF DATASCAN ON YOUR OWN DEVICES

Conducting store inventory counts can be expensive, inconvenient and logistically challenging when utilizing a 3rd party inventory counting provider. Datascan offers a better solution. Our DART Connect program allows you to take advantage of the powerful features in our counting software on your own devices - simple as that!

#### DART Connect is perfect for:

##### Convenience

No waiting for scanners to arrive at your stores. The counting program is loaded and ready to go on your own devices.

##### More frequent counting

Perfect for more frequent counts, like cycle and category counting. With our program on your devices, you're ready to scan anytime.

##### Catastrophic events

Quickly take stock of your store merchandise after a disaster strikes, without worrying about logistical delays.

##### Auditing

Begin auditing earlier using your devices while all rented scanners are in use.

##### Temporary labor

Bring in extra labor to help with your count, without the need for additional scanners.

##### Replacement equipment

Use your own devices as a backup while scanners are charging or while waiting for equipment to arrive in store.

*Any combination of DART scanners, DART Connect for Android phones and DART Connect for Zebra devices can be used to count any of your stores at any time with Datascan.*

# HOW IT WORKS

Simply install Datascan's DART Connect counting software on your Android or Zebra devices. When it's time to count, you already have everything you need. The process is quicker, easier and more convenient. DART Connect reduces the cost of logistics by eliminating the need for additional equipment - plus there is no waiting on a 3rd party inventory counting provider to implement the process.

All of Datascan's powerful features are available on your devices. You can perform inventory, detail audit, external audit and MOS counts from one device. Review, modify or delete counted merchandise immediately, and use the DART web portal or DART Insight app to monitor your count in real time.

# DEVICE REQUIREMENTS

Supported devices must meet the following criteria:

- OS: Android 4.4 or later (TLS 1.2 Required)
- Processor: 800Hz, Single Core, Multi-Core is recommended
- Flash Size: APK (>15MB), SKU DB (Varies by client 10MB-400MB)
- WIFI/Cellular: Required.
- RAM: >500MB
- Barcode Scan Engine: 2D Imagers or 1D Scan Engines

*DART Connect delivers all the power of Datascan's proven self-scan inventory solution, with the ease and flexibility to count whenever you want, using the people and devices you already have.*
