

## Easy to use. Accessible to our retailers. Efficient at delivering results.

Datascan delivers a suite of inventory count services, including self-scan, hybrid counts with labor, and RFID technology. We aim to help our partners count HOW and WHEN they want. Our offerings emphasize real-time visibility and best-in-class plug-and-play technology, complemented by our in-house scanners and round-the-clock customer service, all designed to be simple and easy to use.

### Why Choose Us

#### Plug & Play Technology

Hassle-free implementation: No heavy lifting for your IT, comprehensive training, and a rich resource library. Plus, our DART Connect platform supports a flexible BYOD approach.

#### Real Time Visibility

Ensures enhanced inventory management by tracking your count progress from anywhere. This includes auditing and balancing reports to ensure the integrity of your count, role-based access, employee monitoring, progress alerts, and more.

#### Scheduling Flexibility

Count when you want — regardless of whether you count on a spread schedule or all in one month. Your dedicated Customer Success Manager will help you schedule, execute, and recap your counts.

#### Cost Reduction

Customers typically save between 25-50 percent on the total cost of ownership when making the move to self-scan counts.

### Value for Retailers

#### Internal Audits

- SOC1 Compliant
- Collaboration with the Big 4 accounting firms
- 30-60% reduction in ownership costs
- Real-time data & results
- Predictable Cost- Enterprise Service Agreement

#### Store Operations

- Flexible scheduling, count when you want.
- Report library
- Plug-and-play tech setup
- Ability to pre-count with scanners
- Remote visibility of the entire count process (pre-count to post-count)

#### Loss Prevention

- Control who is in your store
- Quicker indication of annual shrink
- Configurable controls to ensure count accuracy
- SKU level and piece count auditing
- DART Smart trend analysis

#### IT Support

- We are your count IT
- Tailor-made IT solutions within weeks
- Continued solution maintenance
- Independent private network
- Avoid issues/ticket backlogs
- 24/7 technical assistance
