

YOUR PARTNER TO NAVIGATE ALL THINGS INVENTORY

• ABOUT US

We've always been committed to solving inventory challenges for our clients. As times have changed, so have we. Over the past few years, we've adapted, evolved, and expanded our solutions to meet the unique needs of each customer. From self-scan to full-service counts, hybrid counts, supplemental staffing, and end-to-end RFID systems integration, Datascan can support any inventory count and customize the process for retailers.

• WHO WE ARE

Founded in 1970 and headquartered in Carrollton, TX, with an office in Edinburgh, UK, Datascan is a global leader in barcode and RFID inventory counting solutions, serving world-class retailers in over 50 countries. Our company offers specialized technology, including fit-for-purpose scanners and tracking software, to enable efficient, cost-effective inventory management. With a fleet of 125,000 scanners, Datascan supports over 100,000 counts annually across various retail sectors. Strategic partnerships with companies like Frequentiel, Altavant, and Redfern Retail Risk extend our reach in the Middle East, Australia, New Zealand, and beyond. Datascan specializes in retail technology, offering a wide array of inventory counting solutions and consultation to retailers worldwide.

• WHAT WE DO

At Datascan, our goal is to make the inventory counting process easy, efficient, reliable, and accurate for all of our retail and warehouse customers. Our offerings emphasize real-time visibility and best-in-class plug-and-play technology, enabling our partners to count HOW and WHEN they want. With our easy-to-use scanners, advanced inventory tracking software, enhanced data analytics, and our consultative approach, we equip our customers for successful counts every time.

SUPPLEMENTAL STAFFING

We provide the additional manpower to make sure your count is done quickly so you can get back to business. You'll own the process, we'll help get the count done.

FULL SERVICE

An all-in-one package to transform inventory auditing & asset management. This covers every angle of inventory management, with supplemental staffing, training, & consultations. We'll own the entire inventory count process.

RFID

As RFID Subject Matter Experts, we offer SaaS software, solution design, systems integration, & implementation services, ensuring a seamless and effective deployment of RFID technology solutions. We are an end-to-end RFID integration solution.

WAREHOUSE

Utilizing SOC-compliant technology along with full-service labor support & supervision, we optimize the accuracy & efficiency of stock counts, & reducing the costs of end-to-end project management.
